

# Bolt Panel Antenna v.4

## OMNIDIRECTIONAL ANTENNA

The included omni-directional antenna (A) can receive a signal from your transmitter even when it's placed behind the Panel Antenna, and supports a wider spectrum (4.9-7.3 GHz).

## ANTENNA CONFIGURATION

The Bolt Panel Antenna has both vertical (C) and horizontal (B) antenna connectors. The transmitter's antenna configuration will determine which Panel RP-SMA connectors you use with the receiver. For more information, go to [Vertical and Horizontal Antennas](#).
